QTAKE WORKFLOW

Live Camera(s)

QTAKE Station

- Instant record & playback without disrupting current set.
- Simultaneously generate proxies (ProRes/H264).
- Realtime compositing including green/blue chroma keying.
- Enables simple on-set edits and generating of EDL.
- Logging metadata, good takes, notes and generate PDF report.
- Bi-directional talkback to/from 1 QTAKE Monitor device.

with QTAKE local network

with QTAKE Cloud/Server
with QTAKE local network

with QTAKE Server

On-Set Video Village

- Display multi-cam feed on (i) dedicated monitors at video village and (ii) up to 16 iOS/macOS/tvOS devices on local and QTAKE Cloud networks.
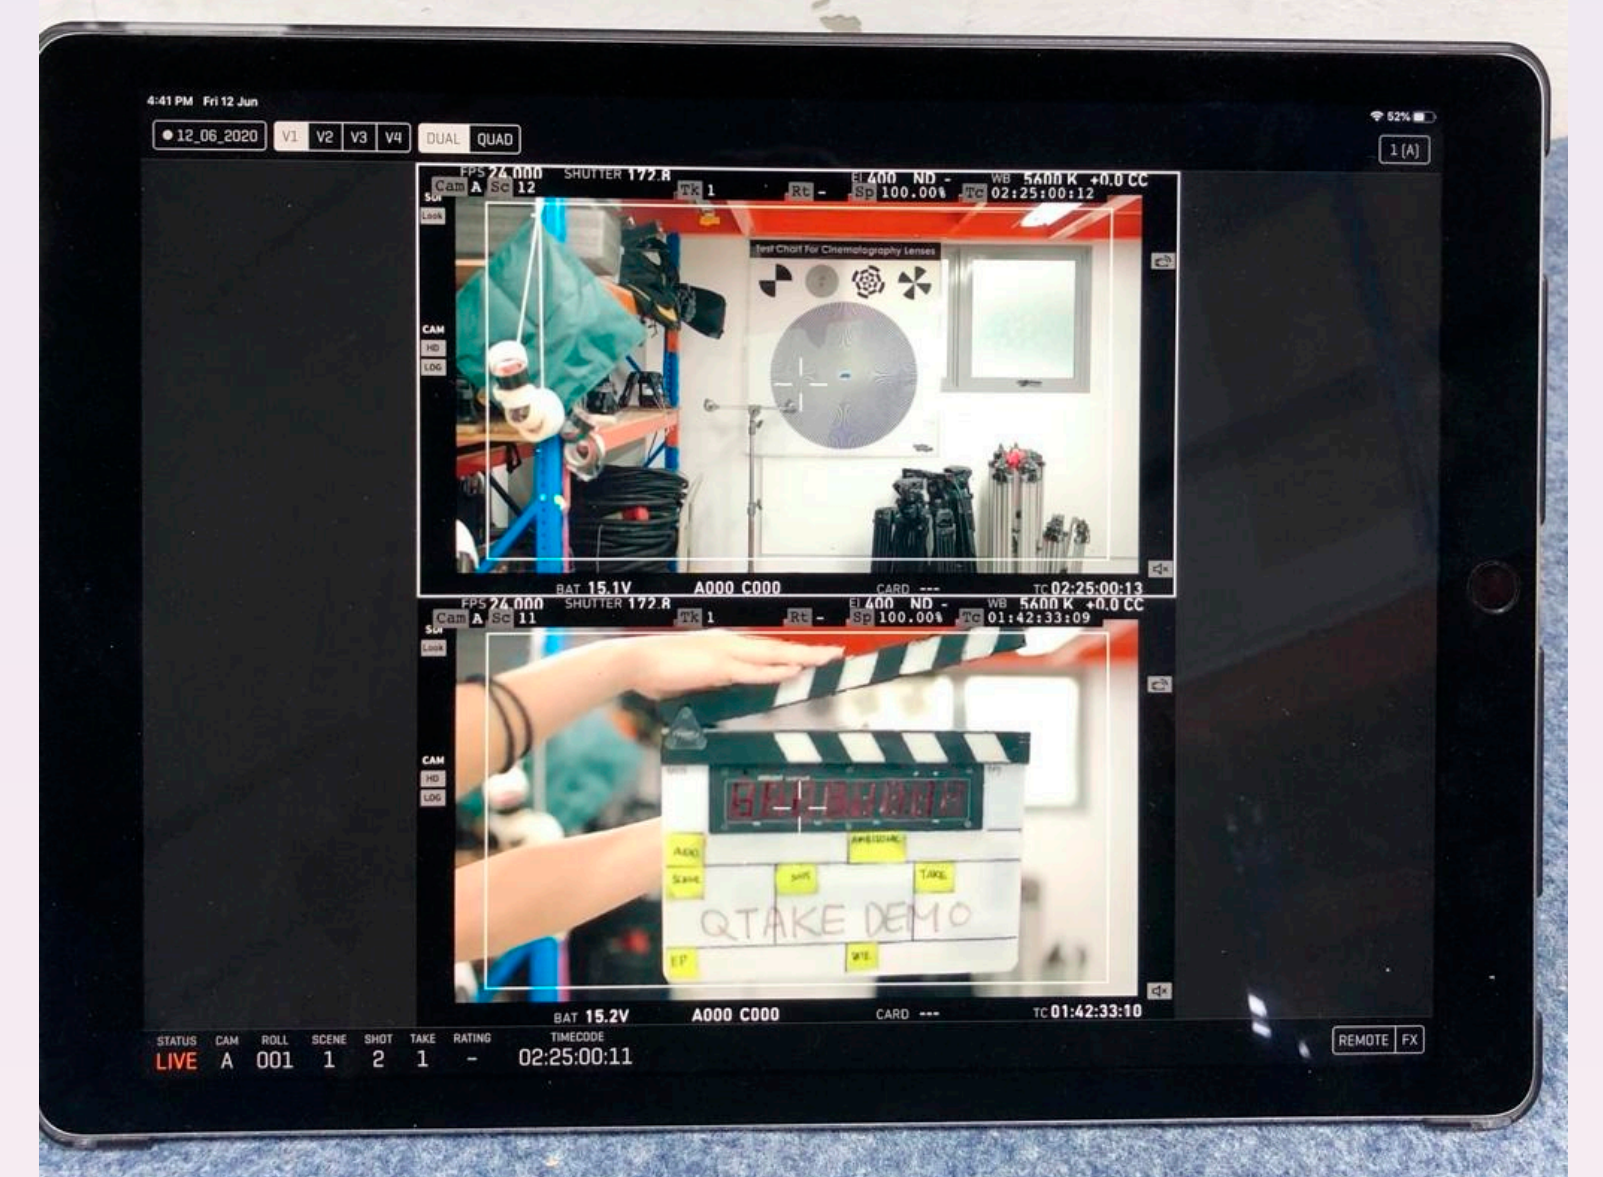

Remote Collaboration

- Use QTAKE Server to view and download all VTR recorded proxies and metadata without disrupting set.
- Post workflow can begin while shoot is ongoing.

Remote Viewing

- Any iOS/macOS/tvOS device can be turned into a wireless monitor on set or remotely. Up to 16 devices can be connected at one time; with QTAKE Server, this number goes up to 160.
- Fullscreen or multi-view layout to compare different takes or camera angles.
- Ultra-low latency and Hollywood-grade encryption.
